DevOps-Module7-Kubernetes-Assignment-3 COMPLETED by Nagesha KS

Please check the following screenshots for each question.

Tasks To Be Performed:

1. Use the previous deployment
2. Change the replicas to 5 for the deployment

Kubernetes Commands

here we need to make 5 replicas or pods

goto master

can do by editing assign1.yaml

or

kubectl edit deploy

edit replica: 3 and make it replicas: 5

kubectl get po

5 nginx machines are there

kubectl get po -o wide
